### About

This will generate an error from the comment after a certain date

### How to use

Add reference to the RSCG\_\_TimeBombComment in the csproj

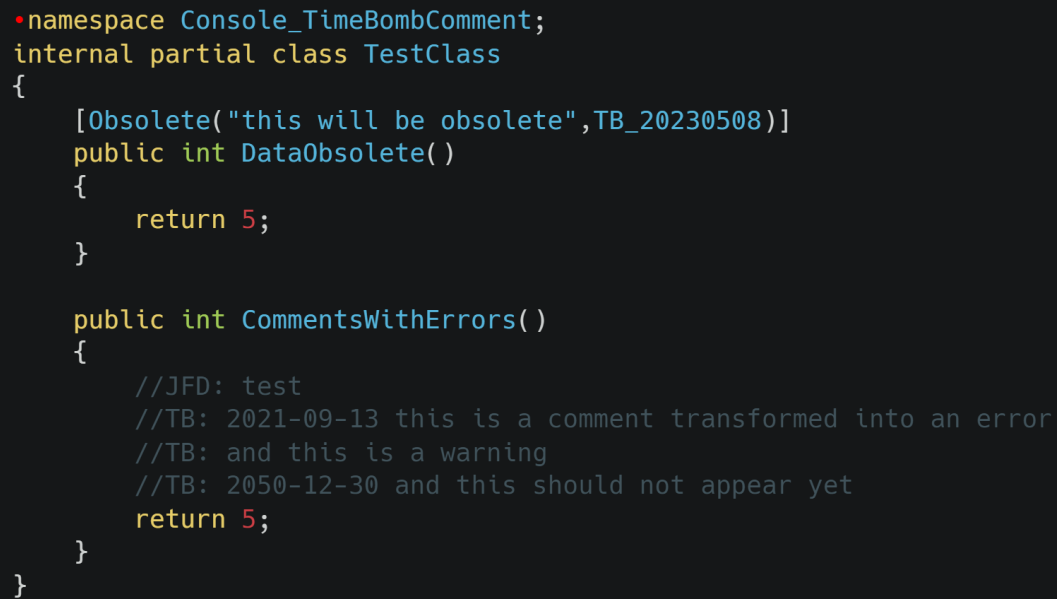

```
<?xml version='1.0' encoding='utf-8'>
  <Project Sdk="Microsoft.NET.Sdk">
    <PropertyGroup>
      <OutputType>Exe</OutputType>
      <TargetFramework>net7.0</TargetFramework>
    </PropertyGroup>
    <PropertyGroup>
      <EmitCompilerGeneratedFiles>true</EmitCompilerGeneratedFiles>

      <CompilerGeneratedFilesOutputPath>$(BaseIntermediateOutputPath)\GX</CompilerGeneratedFilesOutputPath>
    </PropertyGroup>
    <ItemGroup>
      <PackageReference Include="RSCG_TimeBombComment" Version="2023.5.9.2110"
        OutputItemType="Analyzer" ReferenceOutputAssembly="false" />
    </ItemGroup>
  </Project>
```

This was for me the starting code

I have **coded** the file TestClass.cs

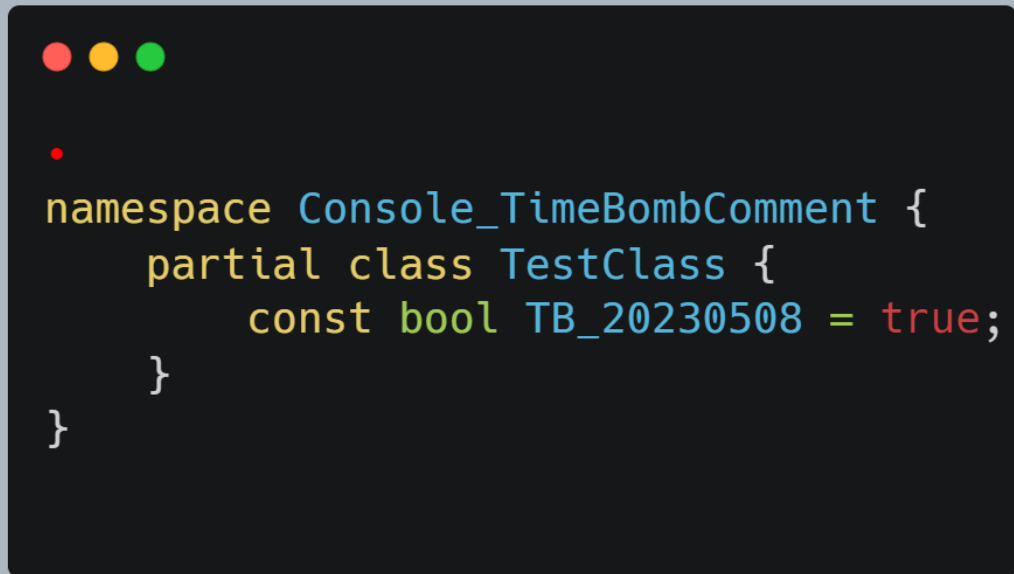

```
namespace Console_TimeBombComment;
internal partial class TestClass
{
    [Obsolete("this will be obsolete",TB_20230508)]
    public int DataObsolete()
    {
        return 5;
    }

    public int CommentsWithErrors()
    {
        //JFD: test
        //TB: 2021-09-13 this is a comment transformed into an error
        //TB: and this is a warning
        //TB: 2050-12-30 and this should not appear yet
        return 5;
    }
}
```

---

And here are the *generated* files

The file *generated* is Obsolete\_\_1.cs

```
.  
namespace Console_TimeBombComment {  
    partial class TestClass {  
        const bool TB_20230508 = true;  
    }  
}
```
